Pure Superior FILTRATION Sand

Rainbow Eco Filtration sand is a top-quality pure silica sand which maintains and enhances the quality of water, and is used in the construction of water filters and well drilling.

The filtration sand goes through a specific process to ensure its purity: it is washed free of all dust and clay particles, graded, dried with natural gas and therefore is 100% bacteria-free. The filtration sand is then sifted to achieve a uniform and defined grain.

- ✓ Uniform, clearly defined quality.
- ✓ Gives maximum water flow.
- ✓ Washed and screened.
- ✓ Bacteria-free.
- ✓ Available in 5kg, 20kg bags or bulk sacks 750kg- 1500kg.
